Contents

Special Section on the ICOVP 2013 Conference

Editorial
Special issue on ‘The 11th International Conference on Vibration Problems’ 343
Z Dimitrovová and A Bracciali

Special Issue Articles
Optimization of the behaviour of high-speed railway tracks using a genetic algorithm approach 345
AFS Rodrigues and Z Dimitrovová

Dynamics of a vehicle–track coupling system at a rail joint 364
I Grossoni, S Iwnicki, Y Bezin and C Gong

Steady-state response of a curved beam on a viscously damped foundation subjected to a sequence of moving loads 375
J Dai and KK Ang

Theoretical and experimental analyses on stabilization of hunting motion by utilizing the traction motor as a passive gyroscopic damper 395
H Yoshino, T Hosoya, H Yabuno, S Lin and Y Suda

Original Articles
Investigating railway track asset management using a Markov analysis 402
D Prescott and J Andrews

Resolving operational parameters for a change-step type of maglev propulsion system 417
W-T Tseng

The use of the $P_C T$ index in railway motion sickness incidence evaluation 428
C Braccesi, F Gianetti and R Scaletta

Energy-efficient train control in urban rail transit systems 446
S Su, T Tang, L Chen and B Liu
